# Introduction

The ARISM VIZ incorporates **two** new innovative designs from Sparmax, the **Smart-Stop** (Details on page 6), and the **Silver Bullet Plus** (Details on page 8). When used in conjunction with each other the result is a compact, ergonomic, and intuitive compressor for airbrushing. The name VIZ was chosen from the similar-sounding 'Vis', which has many meanings in Latin, including 'Nature', 'Efficiency', and 'Strength'. It is also encompassed in the word 'visual', which we felt was fitting, since when it came to airbrushing, the artist was bringing their vision to life on canvas for all to see.

# The Compressor

ARISM VIZ has a DC motor for universal usage (100-240V), coupled with its small size, it is ideal for travel. Additionally, it is designed to draw less power than comparable AC compressors and is also quieter.

As an optional accessory, the ARISM VIZ can also be run with standard Sparmax battery packs.

## Specification

- AC adaptor<sup>1</sup>: INPUT: 100-240V~47-63Hz 1.45A  
OUTPUT: 12V  $\ddot{\text{~}}$  5A max
- Airflow: 16 - 18 lpm (0.57 - 0.64 cfm) at open flow\*
- Preset max pressure: 3.4 bar (50 psi)
- Size: L20 x W12 x H18 cm (7.9" x 4.7" x 7.1")
- Weight: 2.5 kg (5.5 lbs)
- Pressure gauge
- Air hose
- Airbrush holder

## SMART STOP Power Saving Function

An innovative and intuitive feature designed to enhance the users airbrushing experience, the **Smart-Stop** pauses the compressor when the airbrush is placed into its holder and restarts it when it is taken off again. The first of its kind in the market, it is compatible with pressure regulators and bleed valves. Using the **Smart-Stop**, the working pressure before the compressor is paused will be maintained upon restart; this is comparable to the pressure stabilizing effect of an air tank, minus the space taken up! Additionally, the **Smart-Stop** eliminates the frequent on/off condition which can occur when using a traditional auto stop + pressure regulator set up without an air tank. Users with a single action or dual action airbrush will also have the same experience when using the **Smart-Stop**.

\*Patent Pending

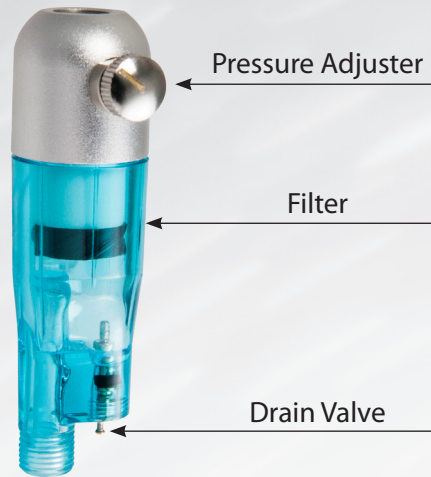

Energy Efficient

# SILVER BULLET™ *Plus*

The next generation of the ever-popular **Silver Bullet**, this new version combines the moisture filtering effect with a built in bleed valve, creating a multi-functional add-on offering greater control at your fingertips in an ergonomic and compact design.

\*Patent Pending

# Operation

1. Connect the hose to the compressor and **Silver Bullet Plus**.
2. Connect the airbrush onto the **Silver Bullet Plus**.
3. Switch on the compressor and adjust to your desired working pressure by using the built-in bleed valve on the **Silver Bullet Plus** and viewing the pressure on the compressor gauge.
4. Begin spraying.
5. When spraying is completed or a pause is required, simply place the airbrush into the holder to pause the compressor.
6. When spraying is to be resumed, take the airbrush off the holder and the pressure will return to the setting from before with no fluctuations.
7. Repeat.

# ARISM VIZ

Included in the box:

Airbrush Holder

Silver Bullet *Plus*

Braided Air Hose

AC adaptor
